

## **This crazy world of complacency, hypocrisy and conspiracy**

Things are “quiet” says the media. ,as far as the war in Gaza is concerned. A war that was instigated, by Hamas’ own admission, with the aim of renewing the terror campaign against Israel, dubbed the military resistance, by kidnapping and murdering the 3 Israeli boys on July 12. A fact that Israel had asserted and Hamas denied up until August 22.

Things are “quiet” because the story is off the TV screens and newspapers’ front (or back) pages. There are no more gory videos of dead women and children (many of them fabricated) to stir empathy toward the people of Gaza who are subjected as human shields to death and destruction by a brutal terror organization that places no value on human life.

Facts do not matter to those who oppose Zionism or Semitism. The eyewitness accounts of Western journalists who upon their return to their free society readily admit that they were manipulated by Hamas, They now report that they were not allowed to photograph Hamas militants in order to create the impression that Israel is only hitting innocent civilians, that they witnessed Hamas militants firing rockets from schools, hospitals and mosques and in so doing committing war crimes. None of this matters to all the “human rights” pretenders, because they are captive to the Islamic narrative and intimidation. Those who continue to criticize Israel in the face of the facts are either complacent, hypocrites or activists who are conspiring to de-legitimize the only free society in the Middle East because it is a Jewish state.

But quiet it is not. Where are all of you who protested and marched on the streets of your host countries, now when hundreds of rockets continue to rain on every city and town in Israel and terrorizing 8 million civilians including close to 2 million Israeli Arabs every hour of everyday?

It is not enough to acknowledge that Israel has the right to defend itself. Every country has such right and indeed an obligation. Hamas, Islamic Jihad, Al Qa’ida, ISIS, Boko Haram. Hezbollah and many other so called militant Islamic radical groups are not only a threat to Israel but to the entire free world. Canadians, Americans, British and other Europeans are joining the ranks of this Islamic wave of violence and terror. These groups and their followers are the world’s enemy number one. Rise against them or they will be knocking down your door soon wherever you are and human rights are not on their mind.

Americans and Europeans and indeed every member of society should stand united against Islamic terrorism, extremism, radicalism and fanaticism and eradicate this cancer from the human body. And that goes for you too, the 90 some odd percent of peace loving Muslims the so called silent majority. The other 10 percent is killing you whether you remain silent or not.
